

## DIRECTIONS FOR USE

### Boom spray, Mist spray or Aerial

Use appropriate personal protective equipment and handling equipment.

Agitate contents well before use.

Fill tank to a minimum of two thirds of water.

Add BioAg Balance & Grow under agitation, bring volume up to full. Before tank mixing, jar test all added nutrients for compatibility of use. Check for physical changes.

Add other nutrients as prescribed under agitation.

Use within 48 hours of dilution.

Rinse tanks and sprayer and flush lines after use.

## TYPICAL RATES OF APPLICATION

Crop	Rate L/ha	Notes
<b>Broad Acre Grasses</b> Cereals, sorghum, corn, sugar cane	<b>1.0 to 3.0</b>	Apply to non-stressed plants from early tillering until first internode elongation of 25 mm. Do not apply after booting commences.
<b>Broad Acre Dicots</b> Cotton, potatoes, clovers, lucerne, peanuts, canola, pulses, sunflowers	<b>1.0 to 3.5</b> <b>1 to 4 Applications</b>	Apply to non-stressed plants during the vegetative growth stage.
<b>Horticulture</b> Vines, citrus, vegetables, nut and fruit trees	<b>1.0 to 4.0</b> <b>1 to 6 Applications</b>	Apply to plants prior to the commencement of their reproductive phase at a minimum dilution of 1:100 with water.
<b>Pastures</b>	<b>2.0 to 4.0</b>	Apply to grazed pastures. Withholding period – NIL

NOTE: The above rates should be used as a guide only. BioAg does not warrant that these rates will necessarily produce the optimal or expected outcome. Each farmer's climatic conditions, before, during and after application, water quality, soil and plant types, application processes and practices may differ and require adjustments to the application rates to ensure optimum results.
