

SAVE and SECURE

with *BioAgPhos*[®]

Reduce your cost of starter fertiliser and **SAVE** when you order *BioAgPhos* today.*

With fertiliser prices remaining high and freight being heavily disrupted, early purchasing ensures product availability when you need it most.

BioAgPhos is an ideal source of capital P (base level) for cropping, where an agronomically sound and cost-effective source of phosphate is required. It reduces starter fertiliser use while maintaining appropriate phosphate levels to support your crop, with around one-third of the phosphorus (P) immediately available.

Benefits of *BioAgPhos* include:

- ✓ *BioAgPhos* provides a highly affordable sustained-release P fertiliser.
- ✓ *BioAgPhos* provides improved crop growth from year-round phosphorus availability.
- ✓ *BioAgPhos* reduces starter fertiliser rates by 30% to 50%.
- ✓ *BioAgPhos* and blends are ideal for blending on-farm and spreading with gypsum, lime, or compost.
- ✓ Independent analysis shows that 100% of BioAg phosphorus is plant available.
